

HEALTH & SAFETY POLICY

OCEANIA

Nestlé regards its people as its most valuable asset and places the highest priority on protecting them. In every country where we operate, our company emphasises the need for safe working environments, which must meet our strict global corporate standards.

Here in Oceania, we are determined to provide a safe working environment for all our employees, contractors and visitors and we are vigilant in continuing to implement Health and Safety practices and programs at all our sites.

We are committed to:

- Valuing our people by providing a safe place to work.
- Identifying, assessing and reducing risk and preventing injury or illness to our employees, contractors and visitors.
- Operating our business to meet health, safety, legislative and other requirements applicable to Nestlé.
- Continually monitoring, reviewing and establishing new objectives aimed at eliminating or minimising work related injury or illness.
- Developing and implementing effective and efficient injury management systems which enable a safe and sustainable return to work for affected employees.
- Providing information, training and supervision to employees and contractors to ensure they understand their roles and responsibilities in eliminating or minimising the risk of workplace injury or illness.
- Encouraging a similar Health and Safety commitment from our suppliers and contractors.
- Consulting with employees and other stakeholders on Health and Safety matters.
- Developing, implementing and maintaining a Health and Safety Management System compliant with OHSAS18001.
